

Travel Summary – All Trips and Day Trips

03 Other Federal Units

In addition to official units of the National Park System, the federal government manages thousands of other sites through agencies such as the National Park Service, the United States Forest Service, the Bureau of Land Management, the Fish and Wildlife Service and a number of others. This list includes those that I visited that fell into this category at the time that I visited them. Some sites that I made repeated visits to may be included more than once due to changes to their names over the years. Some sites are managed by more than one agency, and are included using the same name once for each managing agency.
