

Travel Summary – All Trips and Day Trips

08 Scenic Routes

This lists the designated scenic and historic routes that I have traveled on primarily in the United States and Canada. These routes have designated by federal and state agencies, and to a lesser extent local agencies and tourism organizations. Sometimes, multiple agencies have designated the same stretch of road as a scenic route, although they may give it different names based on their own naming conventions. There is a separate item for each such designation. A few scenic routes designated at the national level may cross state boundaries, and will have one entry that includes all the states. Sometimes, adjacent states may designate what seems to be a cross-state-boundary route, but because each state administers its own segment, these will have separate entries.
