

Travel Summary – All Trips and Day Trips

14 Native American Reservations

Reservations are tribal lands governed by one or more Native American tribes, and are much more common in the western United States than in the eastern United States. Reservations have state-like qualities. Although they are part of the states where they are located, they have laws and customs that also distinguish them from those states. There are often limits on where and when non-tribal members can travel on tribal lands, the places they can visit, whether and what they can photograph, and what events they can participate in. Most visitors are often oblivious to these, at least until they end up on the wrong side of tribal law.
